

Sepha joins forces with MD Packaging

Sepha is pleased to announce a new partnership with MD Packaging in Canada for two of its main leak test devices for induction sealed bottles. This new relationship expands Sepha's existing sales network in Canada with a focus on the food and beverage industries.

Operating from its headquarters in Uxbridge, Ontario and four regional offices, MD Packaging has 30 years' experience as an expert distributor of product inspection and packaging automation solutions for the manufacturing sectors in the food, beverage, pharmaceutical, consumer goods and industrial products industries. MD Packaging will represent Sepha's BottleScan and Multi-Q, two non-destructive and deterministic leak detection devices developed to test the integrity of induction sealed bottles.

Jaime Alboim, CEO of MD Packaging is excited about the new partnership: 'It's great to be able to provide leak test solutions as part of our product offering. We are well known in Canada for our product inspection/food safety solutions and automation systems including induction cap sealers. The Sepha BottleScan and Multi-Q will be a welcome addition as these non-destructive leak test solutions can help our customers improve their quality control process and assure product integrity of their induction sealed bottles, without damaging the bottles in the process.'

Paul Smith, Head of Sales & Marketing Sepha adds: 'We have found a great partner in MD Packaging. Their longstanding and loyal client relationships are a testament to the strength of their team. MD's knowledge and expertise of induction cap sealers in these markets will be invaluable for Sepha to grow, especially in the food & beverage industry.'
