

BF30-G Bliss Former

The Pearson BF30 Bliss Former assembles a wide variety of sturdy shipper and display-ready, three-piece bliss box designs at rates up to 30 cases per minute. The BF30 is optimal for larger boxes. A gravity fed magazine and a powered end-panel magazine with following paddle ensure that each panel is accurately presented for pick off. To establish consistent glue compression and case squareness, the active forming section impacts the gluelines as opposed to rubbing over it.

| | | |
|------------------------------------|--|------------------------------------|
| Speed | up to 30 bliss boxes/min | |
| Min. Case Size Base Machine | 8" (L) x 8" (W) x 4" (H) | Extended case size range available |
| Max. Case Size Base Machine | 24" (L) x 24" (W) x 12" (H) | |
| Sealing | Hot Melt Glue | |
| Changeover | Manual, supported by HMI graphical guided instructions and changeover map, scales, pointers, and quick release handles, 45 min (estimate for trained technician) | |
| Construction | Mild Steel Stainless Steel Low Pressure Washdown | |
| Machine Size Range (ft) | 13.5 (L) x 12.1 (W) x 9.5 (H) | |
| Controls | Allen-Bradley CompactLogix PLC PackML Compliant PanelView Color HMI | |
| Air Requirements | 80 PSI | |
| Power Requirements | 460 VAC | |
| Disconnect Sizes | 30 Amps | |
| Air Consumption | 2.046 SCF/Cycle | |
| Full Load Amp Base Machine | 14 Amps | |
| Case Support |  Bliss Shipper | |

Standard Features

- HMI with User Centric Design
- Safety Redundancy with CAT 3
- Reliable Non-Contact Interlocks
- High-Visibility Machine Status
- Easily Accessible Grace Port
- Auxillary Operator Station
- Remote Access Support Capability

Popular Upgrade Options

- Custom Case Ranges
- Extended End Panel Magazine
- High Capacity Stack Transfer System
- High Capacity Adhesive Feeder
- Plant Level Ethernet Connection
- Air Conditioner
- Low Temperature Environment

Information

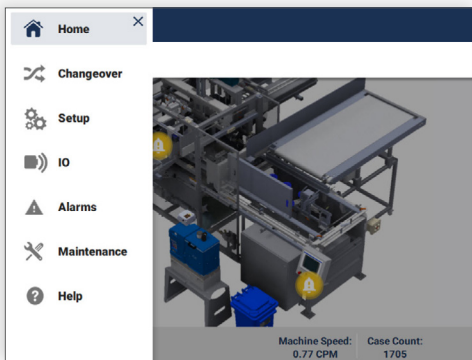

User Centric Design

Minimize training time | Increase changeover and fault-recovery speed | Promote improved machine maintenance

Machine operators that perform their tasks independently free up maintenance time and keep lines running smoother. Yet frequent turnover, language barriers, and skill gaps in these positions pose significant challenges to operations teams asked to meet production goals while reducing costs in the process. Pearson's User Centric Design is there to help.

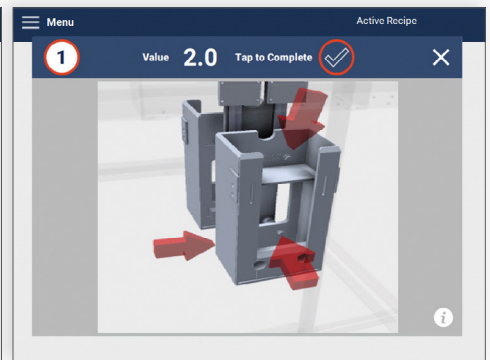

With an uncluttered design, intuitive navigation, interactive guides, live sensor maps and advanced maintenance features, the HMI has morphed into a personal assistant.

**Not just a
great product
but a reliable
partner**

- Find reliable, thought-out solutions based on 60 years of experience | 30 years of robotic integration
- Expect a rugged machine design optimized for high-volume 24/7 operations
- Optimally support a high-turnover labor force with an intuitive Human Machine Interface (HMI)
- Benefit from a uniform user interface for your erecting, packing, sealing, and palletizing equipment
- Experience premier industry lead-times for faster delivery and shorter down-payment cycles
- Depend on our project managers to provide ongoing visibility to meet delivery timelines and budgets
- Count on comprehensive sales, aftermarket, and service support
- Rely on extensively trained and FANUC Certified technicians to service your equipment
- Always lean on us for 24/7 live service support
