

FLEXiCELL

Robotic Case Packing Solutions

Efficient • Reliable • Flexible

Case Packing Systems

Features

- Flexibility for different product types and case sizes
- The best technology; highly-customizable servo-powered robots
- Powder-coated aluminum or corrosive-resistant stainless steel
- Industry-standard construction; Sanitary washdown; Meets special environment requirements
- User-friendly interfaces and controls with multiple-level operator and maintenance screens
- Adaptable collation or vision-guidance

Benefits

- Efficient, versatile, reliable, flexible
- More productive lines with greater uptime
- Fast changeover enables quick packaging for **all** your products
- Save money; Acquire a return on your investment
- Meet ever-changing packaging demands quickly and easily
- Integrate with **carton loading** and **palletizing** for a full end-of-line solution

Material handling is incorporated into each case packing system. Examples include conveyors for product or case transfer, scanning and vision validation of products, and automated collating of products or cases.
