

## Hot Glue Labelling

### Magazine or Roll-Fed Hot Glue

Regardless of your preference in glues, precise wrap-around labelling with hot melt gluing technology is possible with diverse container types and sizes.

- Economical continuous operation
- Self-contained hot glue system for low energy consumption and low emissions
- Compatible for paper and foil labels

### An Economical Alternative Amid Rising Equipment Prices

- GERNEP HotSpot nozzle system
- Low glue consumption due to the self-contained gluing system
- Start gluing as dot application
- End gluing ledge for perfect label overlap
- Variable adjustment of gluing
- Minimized conversion and cleaning time
